APPLICATIONS

Reliable piping systems for an efficient and sustainable infrastructure.

We produce true all-rounders for you so that you can master the requirements of a wide variety of projects with ease!

SOLUTIONS YOU TRUST

We guarantee the highest quality, safety and functionality of our products through regular material and batch testing in accordance with national and international standards. Accredited testing institutes monitor this process and certify our products.

ARE YOU PLANNING YOUR NEXT PROJECT?

We accompany you! Together with you, we develop a tailor-made solution that meets the requirements of your construction project.

1. Your challenge

2. We advise you

3. We develop your product

4. Produced on time

5. Your solution

6. We support you on site

EVERYTHING FROM ONE SINGLE SOURCE

For applications in industry, waste disposal and supply

YOUR SYSTEM PROVIDER IN PIPELINE CONSTRUCTION

We support our customers in a wide range of industries worldwide with precisely produced molded parts and piping systems made of polyethylene (PE) and polypropylene (PP).

Established 1995

Wesel Germany

Dubai VAE

SUSTAINABILITY

We attach great importance to environmental protection in the manufacture of our products: we cover 100% of our electricity requirements from renewable sources. As a result, we avoid around 3.8 million tons of CO₂ emissions every year.

ADVANTAGES OF PLASTIC PIPING SYSTEMS

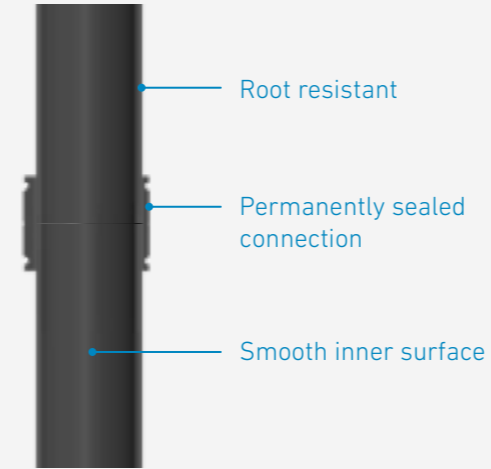

Pipe systems made of high-quality thermoplastics such as PE & PP impress with their versatility, durability and outstanding material properties. This makes them the preferred choice in industry, supply & disposal.

Corrosion-resistant

Stress crack resistant

PE-FITTINGS

Dimensions:
d 20 - 2500 mm

Individual special solutions and other materials on request.

Electrofusion fittings

Pressure class conform fittings

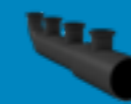

Seamless bends

Flange connections

Segment welded fittings

Customized solutions

PIPE SYSTEMS

Dimensions:
d 20 - 1400 mm

SEMI FINISHED

Dimensions:
d 120 - 2575 mm

MACHINES

Dimensions:
d 20 - 2200 mm

Electric welding machines, trenching and workshop machines, pipe peeling machines, saws & machine maintenance.
